

Special Cutting Tools

Mikron Tool 

Highest machining precision comes with it

High performance special purpose cutting tools

Use only the best, make no compromises!

Unlike standard tooling, special purpose cutting tools are manufactured according to the task they have to perform. Thus they guarantee best conditions for a process capable of cost efficient machining of your precision parts.

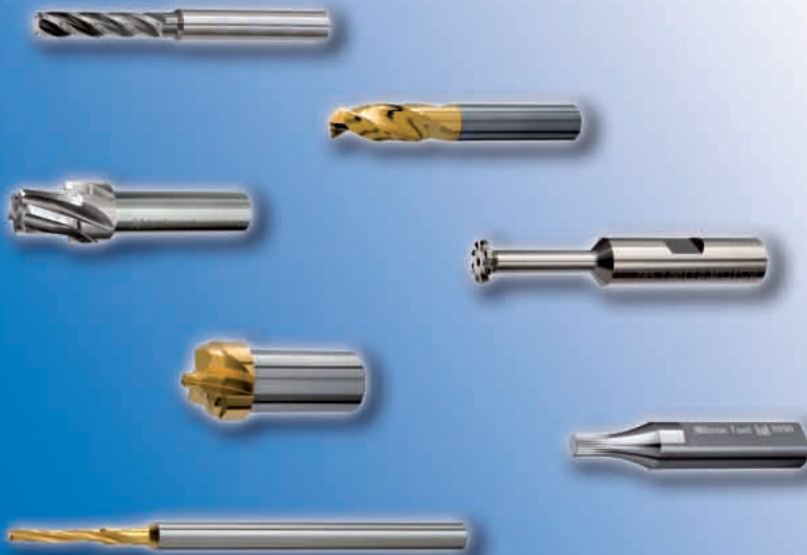

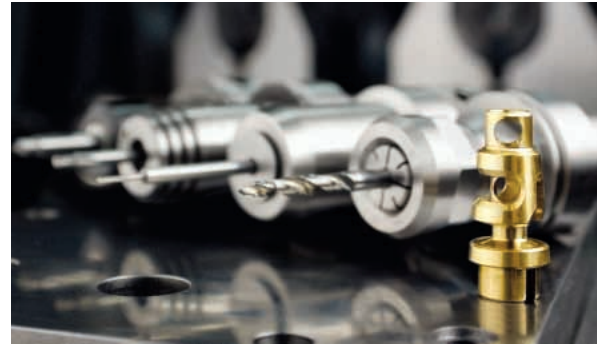

Wide product range:

Mikron Tool supplies cutting tools made from carbide alloys for all common chip removing operations, also with internal cooling.

Offering:

- drills with diameters from 0.1 mm to 32 mm
twist drills, step drills, gun drills
- center drills, pilot drills, NC spot drills
- reamers and calibrating tools
- turning and recess turning tools
- end mills and profile milling cutters with continuous profile (logarithmic relief grinding) up to \varnothing 200 mm
- special tools for ball point pen tips

Try us! We gladly help you resolve your machining challenges.

Our know-how = your competitive edge

Experience cannot be copied.

Mikron Tool offers professional support from Engineering to cutting tests and improvement of working cycles.

The Mikron effect

Mikron Tool SA Agno as cutting tool supplier and Mikron SA Agno as machine tool manufacturer have many decades long service experience in hightech engineering. Cutting tools from Mikron Tool are often a crucial factor of success. They offer optimal process reliability for cutting operations with high precision and productivity requirements.

Our standard drill program

Mikron Tool supplies twist drills from carbide alloy in many dimensions and executions right from stock:

CRAZYDRILL™
by Mikron Tool

the high performance drills, CrazyDrill Pilot, CrazyDrill Steel, CrazyDrill Cool and CrazyDrill Alu are utilized with great success in the high volume production of precision parts and for materials difficult to machine.

MIQUADRILL™
by Mikron Tool

MiquDrill Centro, MiquDrill 200 and MiquDrill 210 are mainly used by manufacturers having small batches and a rich variety of work pieces.
