PREVENTIVE

Spindle & Groups Overhaul

Expert know-how directly from the manufacturer

Mikron Service Solutions

Accurate and highly productive machines require accurate spindles & groups and an impeccable overhaul service. In our worldwide spindle & groups repair centers, our experts test and overhaul your spindles & groups with the expertise and know-how, you obtain only from the original equipment manufacturer.

OUR SERVICES

- **Expert Overhaul** - Experts, equipped with special tools, work on the overhaul of your spindle & groups. The use of original spare parts, such as precisely matched bearing packages, guarantees a longer life for your spindle & group.
- **Fine balancing** - We achieve minimum vibration levels and pinpoint concentric accuracy by fine balancing all rotating parts of the spindle.
- **Tests run and quality assurance** - With test runs of several hours we ensure correct breaking-in and quality of the overhauled spindle. Relevant quality parameters, such as temperature variation, vibration and concentricity, are checked and the values recorded in our spindle database.
- **Xchange Service*** - To minimize the downtime of your equipment we also offer our Xchange Service for many types of spindles. Completely overhauled spindles are immediately ready for installation from our inventory. Your advantages:
 - Minimum downtime of your equipment
 - High degree of operational reliability
 - The same warranty as on new parts
 - Lower cost
- **6 month warranty** - All revised groups pass a running test to ensure the Mikron quality and allows us to grant you additional 6 months warranty.

Please check availability of Xchange items with your Mikron Service Center.
*Mikron NRG & Multistep XT-200

YOUR BENEFITS

- The original repetitive precision is reproduced and guaranteed
- Increased cutting tool life
- State-of-the-art equipment used
- Traceability with spindle history and quality control documentation
- Long life expectancy of your overhauled spindle
