

For our German site in Rottweil we are looking for an

Engineer/Technician for software construction and commissioning (m/f)

Mikron Machining is the leading supplier of customized, highly productive machining systems for the manufacture of complex high-precision components made of metal, such as turbocharger housings, injection nozzles and ballpoint pen tips. Mikron Machining develops and produces the necessary high-performance cutting tools itself, and these are regarded as some of the best in the world.

Your main tasks

- _ Creating SPS- and NC-programs and robot applications
- _ Commissioning tooling machines
- _ Continuous documentation
- _ Creating and verifying safety technology
- _ Recommissioning and modifying tooling machines at the customer's site
- _ Adapting graphical user interfaces
- _ Developing and optimizing new control concepts and NC-cycles

Our offer

- _ Attractive remuneration and good social benefits
- _ A comprehensive and targeted training period
- _ A future-oriented workplace, equipped with the latest technology
- _ Active participation opportunities in operational optimizations

Your profile

- _ Technical education and further training as a technician and/or technical course of study
- _ 3-5 years' experience in a similar position
- _ Experience of control technology (Bosch Indra Motion MTX and/or Siemens 840Dsl), as well as robotics (Stäubli, Fanuc, Kuka) would be an advantage
- _ Good command of written and spoken English
- _ Reliable, solution-oriented and thinking personality with a hands-on mentality
- _ Strong communicator and team player with good judgment

Have we aroused your interest? Then send us your complete application, together with your salary expectations and your earliest availability, preferably by e-mail. Please do not forget to inform us how you became aware of our job advertisement. If you have any questions, please contact Mrs Angela Schlaich, Head of Human Resources, Tel. +49 741 5380 100.
